A BIOCHEMICAL SOCIETY SCIENTIFIC MEETING

Protein Dynamics & Transient Interactions

11–13 September 2024
Colchester, UK

Protein Dynamics & Transient Interactions is an international scientific conference that brings together leading experts in protein science who study how dynamics influence a wide range of biological functions, from allosteric properties and misfolding to cellular signaling and drug targeting.

This conference provides a platform for researchers to communicate new discoveries in the field of protein dynamics, and their role in ligand and protein interactions. It will offer a unique opportunity to engage with leaders from institutions and organisations worldwide that develop and use multidisciplinary approaches to characterise protein dynamics, and bring together computationalists and experimentalists from physics, chemistry, and the biosciences.
